MyoFetch2019 - Task #14470

Variable Monitoring

25/02/2019 11:40 - Ana Sofia Santos Cardoso

Status:	New	**Start date:**	01/04/2019
Priority:	High	**Due date:**	13/05/2019
Assignee:		**% Done:**	95%
Category:		**Estimated time:**	0.00 hour
Target version:		**Spent time:**	0.00 hour

Description

Investigate EMG processing methods and gather information on the subject.

Subtasks:

Task # 14504: EMG processing circuit	**In Progress**
Task # 14519: Filter Design	**Resolved**
Task # 14525: Filter Testing	**Resolved**
Task # 14580: Obtaining a readable EMG signal	**Resolved**

History

#1 - 05/03/2019 21:28 - Ana Sofia Santos Cardoso

- % Done changed from 0 to 30

3/5/2019 - Further investigation necessary on the processing front. Look into signal processing using java and arduino as well as commonly used algorithms.
